PROJECTS

ORT Homepage

(10/2025 - 06/2026)

Company in charge of project: OpenReachTech Hanoi JSC

Customer	OpenReachTech
Description	The official corporate website for Open Reach Tech, built as a modern server-rendered web application. It serves as the company's public presence — showcasing its products and solutions, publishing technical insights, and handling recruitment and customer inquiries — across three languages (English, Japanese, and Vietnamese).
My position	Front-end developer
My responsibilities	• Build, develop all page structure • Update the website content as required.
Technologies used	• Nuxt 3 • Mailgun • reCAPTCHA v2, via server API • @nuxt/content • i18n
URL	https://openreach.tech/

Hennyu Online

(12/2025 - 06/2026)

Company in charge of project: OpenReachTech Hanoi JSC

Customer	Hennyu
Description	"Hennyu Online" (編入 = university transfer-admission tutoring) is an online education/coaching platform. The product is delivered as three separate frontends, one per user role, all living side-by-side. • Admin — staff operations console: manages coaches, students, courses, sessions, colleges, transfer-info databases, and announcements. • Coach — tutor workspace: assigned students + session management (create/edit/view). • Student — learner app: target-school list, session history & feedback, profile.
My position	Front-end developer
My responsibilities	• Implement new features based on customer requests. • Update and fix bugs that occur during use or based on customer reports.
Technologies used	• Nuxt 3 • GraphQL • linkify-html • sanitize-html

Linoa AI Concierge

(2/2026 - 06/2026)

Company in charge of project: OpenReachTech Hanoi JSC

Customer	Lino-a Co., Ltd.
Description	Linoa AI, a multilingual, voice-and-text AI concierge for hospitality facilities (hotels/resorts). Guests interact with an AI avatar to chat, browse facility content, and navigate services. - Core features: - Concierge chat — the heart of the app: streaming chat responses, an animated concierge avatar video, voice input (mic recording + volume monitoring), speech output (TTS audio playback), proactive messages, and quick-option navigation. - Facility menus & content — browse restaurants, room service, sightseeing, plans, borrowed items, and room information, with category/content detail routing. - Facility map — Leaflet-based interactive maps. - Multilingual language selector and locale-aware content fetching.
My position	Front-end developer
My responsibilities	- Implement the initial page structure (including the structure of categories/contents). - Implement multilingual feature. - Update and fix bugs that occur during use or based on customer reports.
Technologies used	- Nuxt 3 - GraphQL - leaflet - Prime Vue - qrcode
